MINI PC

The Hyundai Mini PC is fan-less, ultra-portable, power efficient and designed to produce zero noise. It enables a more robust option with no moving components, while maintaining a compact design and a wide range of I/O connectivity.

A silent solution for 2020 edge computing systems, the Hyundai Mini PC is the ideal device to meet the everyday computing needs. It possesses a powerful digital signage platform that supports 4K displays and so much more. Perfect for multitasking, home theaters, office work, digital security and surveillance, digital signage, media center, conference room and POS systems.
